### **PART I - EXPENDITURES AND POSITIONS**

FY 2009-10 - At the end of the first quarter the expenditure variance is due to vacant positions, reduction in force actions, delays in the execution of contracts, and additional expenditure controls on the procurement of equipment, travel, and staffing resource contracts.

#### **PART II - MEASURES OF EFFECTIVENESS**

No significant variances.

PROGRAM TITLE: COMMUNICABLE DISEASE SERVICES

05 01 01 01 HTH 100

#### **PART I - EXPENDITURES AND POSITIONS**

The FY 09 and FY 10 position variance is due to vacancies from more restrictive budget policies on the hiring of positions.

#### **PART II - MEASURES OF EFFECTIVENESS**

- Item 1. Variance in FY 09 is related to a higher percentage of cases from the Philippines and Compact of Free Association (COFA) migrants.
- Item 5. Decrease in gonorrhea case rate per 100,000 may be due to change in behavioral interventions from STD awareness campaigns.
- Item 6. The variance in the # of newly reported AIDS cases per 100,000 is due to the effectiveness of intervention and treatment of HIV infected individuals. Due to antiretroviral therapy, HIV infected people are living longer without developing symptoms of AIDS and decreasing the rate of AIDS in Hawaii.
- Item 7. Variance inherently exists for this measure due to the variety of ways cases are detected. The program finds cases through active outreach education and screening by program staff in variety of venues in the community emphasizing and assisting with early detection. Cases are also detected through clients seeking medical evaluation on their own which the program has little influence on that factor. Since rate number numerators are often between a total of 10-25 new cases detected per year, it is expected that a variance will occur when the prevalance rate fluctuates only between 1 to 2 per 100,000 population annually.
- Item 8. Positive variance is due to an emphasis of timely nursing case management, which lowers the rate of complications of Hansen's Disease.
- Item 9. FY 2009 patient/resident days lower than planned due in part to higher number of patient deaths. FY 2010 estimate has been adjusted accordingly.

#### **PART III - PROGRAM TARGET GROUPS**

- Item 2. The increase is due to implementing aggressive contact investigation techniques to elicit more contacts from infectious TB cases.
- Item 5. The decrease in contacts of Chlamydia cases from DOH's STD clinic is due to staff vacancies.
- Item 6. Variance is due to increased outreach testing and the use of HIV rapid tests.
- Item 8. Estimated number of Kalaupapa registry patients adjusted to account for higher number of patient deaths.
- Item 9. The FY 09 variance is due to an increased number of contacts (where contacts are those who have had prolonged exposure to the new case and are amenable to being screened for symptoms of Hansen's disease) identified and screened per new case of Hansen's disease.
- Item 10. Decrease is due to combination of attrition (cases on registry leaving the state) and the number of new cases added to the registry being diagnosed at an earlier stage and starting treatment before disabilities develop.

### **PART IV - PROGRAM ACTIVITIES**

- Item 1. Increase is partly due to immigration from Philippines and COFA migrants.
- Item 2. Variance due to the increased number of contacts identified.
- Item 6. The FY 10 variance of the reduced estimated number of women screened is probably due to providers in the family planning program not participating with STD program activities.
- Item 9. Increase in number of syringes exchanged is due to increased activities to reach intravenous drug users statewide.

PROGRAM TITLE: COMMUNICABLE DISEASE SERVICES

05 01 01 01 HTH 100

Item 10. The estimated decrease in the number of Kalaupapa patients provided an annual physical or rehabilitation assessment reflects the number of surviving patients. All living patients have had a physical exam or rehabilitation assessment.

PROGRAM TITLE: DISEASE OUTBREAK CONTROL

05 01 01 02 HTH 131

#### **PART I - EXPENDITURES AND POSITIONS**

The variance between the budgeted and actual number of positions is due to the inability to attract qualified applicants having suitable experience and skills as well as to the current and prior freezes on hiring. The variances in expenditures are due to the delay in obtaining all required approvals for one contract that was executed in 3rd rather than 1st quarter, as well as salary savings, the addition of collective bargaining amounts, and spending restrictions.

#### **PART II - MEASURES OF EFFECTIVENESS**

2. The variance in the pertussis case rate is due to inconsistent testing by physicians.

#### **PART III - PROGRAM TARGET GROUPS**

- 2. The variance is due to the repercussions of an unstable and weak economy resulting in a decrease in the number of visitors.
- 3. The 10% variance in the # children attending licensed preschools could be due to fewer families able to send their children to preschool and possible decrease in the number of preschools due to the economic downturn in FY 2009

### **PART IV - PROGRAM ACTIVITIES**

1. The increase in the amount of purchase is due to the increasing

participation of schools in the Stop Flu at School program, as well as higher uptake among students. Stop Flu at School clinics provide influenza vaccination to elementary and middle school students at public and private schools statewide.

- 3. The Department of Health stopped providing hepatitis B screening to immigrants in May 2005. Assessment of the data over the past years indicated that routine screening was not cost effective. Individuals are referred to community clinics for services, which fosters the goal of individuals having a medical home to obtain all types of health care services.
- 4. The increase is due to continued improvement in electronic laboratory and clinician reporting of communicable diseases. Better surveillance and more laboratory testing have led to a much greater number of investigations. The number of cases investigated has also significantly increased due to the 2009 H1N1 influenza pandemic. The actual and estimated amounts represent the number of received cases being reviewed and further investigated. This number in the past reflected confirmed cases that were investigated.
- 5. The 10% variance in the # of preschoolers surveyed for immunization coverage is due to the decrease in the number of children attending preschools in FY2009.

PROGRAM TITLE: DENTAL DISEASES

05 01 02 HTH 141

#### **PART I - EXPENDITURES AND POSITIONS**

#### FY 2010:

The variance is attributed to the abolishment of the Dental Hygiene Branch, furlough days, and delay in filling vacant positions.

#### **PART II - MEASURES OF EFFECTIVENESS**

#### FY 2010:

1., 2. The variance is attributed to the deletion of the Dental Hygiene Branch.

### **PART III - PROGRAM TARGET GROUPS**

#### FY 2010:

1., 2. As a result of the deletion of all of the positions within the Dental Hygiene Branch in FY 2010, the number of pre-school and school aged children that was estimated to be seen by the branch decreased significantly in FY 2010.

### **PART IV - PROGRAM ACTIVITIES**

#### FY 2009:

- 1. The variance is attributed to the retirement and deletion of a position in the Dental Hygiene Branch.
- 7. The variance is attributed to the resignation of a Dentist VI position in FY 2009.

#### FY 2010:

1., 2., 6. The variance is attributed to the deletion of the Dental Hygiene Branch.

05 01 03 HTH 730

#### **PART I - EXPENDITURES AND POSITIONS**

Positions vacant as of June 30, 2009 were State EMS Medical Director (No. 101598), Clerk III (No. 34939), Clerk III (No. 34938), Clerk III (No. 46154), a temporary Public Health Educator IV (No. 118520/94027H) and Public Health Educator IV (No. 117280). The variance in FY 09 expenditures is primarily due to unspent federal/special fund ceiling, unspent general funds for Oahu aeromedical services, general fund restrictions, vacancy savings, and a transfer of funds to Adult Mental Health Division (HTH 420) to address their FY 09 mandated service needs and a transfer of funds to Developmental Disabilities Division (HTH 501). In the first guarter of FY 10, actual expenditures and encumbrance are lower than budgeted due to a time lag in encumbering special funds from the American Recovery and Reinvestment Act of 2009, a time lag in encumbering general funds and EMS special funds in ambulance services contracts, a time lag in encumbering EMS special funds in the MICT, EMT, and CME training contract, and a time lag in encumbering trauma system special funds. The lower estimated expenditures and encumbrances than budgeted for the nine months ending June 30, 2010 is due to anticipated budget restrictions for furlough savings and a continued lag time in encumbering special funds from the American Recovery and Reinvestment Act of 2009.

#### **PART II - MEASURES OF EFFECTIVENESS**

- 5. Increase due to Cross Program Integration Training (11/09), Injury Prevention Program involvement in advisory committees associated with the statewide Trauma System and increased activity in fall prevention and suicide prevention.
- 6. Increase due to a statewide Suicide Prevention Conference.

#### **PART III - PROGRAM TARGET GROUPS**

6. In the past, AMR was reported as a single licensed provider for services provided in Kauai, Oahu, Maui, and Hawaii Counties of the State. In FY 09 and FY 10, AMR is reported individually for each county in which they are licensed to provide services resulting in the higher

actual and estimated total.

#### **PART IV - PROGRAM ACTIVITIES**

- 8. For FY 09 and FY 10 the planned number of days administering and maintaining the State Health Emergency Preparedness Plan should read 260 and included a position (1.0 FTE) dedicated for this purpose. That dedicated position was transferred to HTH 131/DB which results in less time to address this measure. The 36 days reflect the time that the EMS Manager contributed in her role as State Civil Defense Coordinator for the Dept. of Health.
- 9. Increase due to a statewide Suicide Prevention Conference.
- 10. Increase due to Cross Program Integration Training (11/09), Injury Prevention Program involvement in advisory committees associated with the statewide Trauma System and increased activity in fall prevention and suicide prevention.

PROGRAM TITLE: DEVELOPMENTAL DISABILITIES

05 01 04 HTH 501

### **PART I - EXPENDITURES AND POSITIONS**

Variance in positions in FY 09 and FY 10 is due to difficulties in recruiting and filling of vacancies due to budget restrictions.

Variance in expenditures in FY 09-10 is due to a change in the way DD provider payments are processed. Previously the DOH paid the entire provider claim and was reimbursed for the federal share. In July 2009 DDD changed the claim system so that payment is made by DHS instead and DOH reimburses the DHS the general fund share. Therefore, for services after June 2009 the DOH no longer receives federal funds into the U fund. There is a minimal amount of Federal reimbursements to DOH in FY 10 for claims that are being processed manually for FY 09 service dates.

- As other services are being reduced more people are applying for services with the DDD. There has also been a noticable large influx of children applying for services.
- 4. Due to budget and staffing reductions, the program is not expected to complete as many certifications as planned for FY 10.
- 6. Due to increased amounts of support services being offered to the individuals we serve, more people have been able to live independently.
- 7. Over the past year the overall availability of employment opportunities have gone down statewide and this has also affected the opportunities for the DD/MR population.

#### **PART II - MEASURES OF EFFECTIVENESS**

4. Over the past year the overall availability of employment opportunities have gone down statewide and this has also affected the opportunities for the DD/MR population.

#### **PART III - PROGRAM TARGET GROUPS**

No variance

#### **PART IV - PROGRAM ACTIVITIES**

PROGRAM TITLE: FAMILY HEALTH

05 01 05 HTH 560

#### **PART I - EXPENDITURES AND POSITIONS**

For FY09 the Family Health Services Division (FHSD) did not expend the budgeted total of 4.5% or \$4,361,453 primarily because of restrictions in the form of freezing vacancies and restrictions on purchase of service (POS) contracts. Other reasons for under expenditure were special, federal, interdepartmental transfer fund ceilings as budgeted were higher than actual receipts realized.

For FY10 first quarter, position vacancies were frozen due to impending reduction-in-force (RIF) and delays in POS contract encumbrances have resulted in lower than anticipated expenditures. Some of the federal funded projects are delayed due to staffing freezes. The Early Intervention Special Funds were not expended as anticipated due to closure of the Healthy Start program. Three programs operating under Memorandums of Understanding (MOA) with the Department of Human Services (DHS) will not be continued.

The projected expenditures for the remaining three quarters will still result in less than the projected annual amount because of the above noted lower level of revenue in special, federal and interdepartmental transfer funds; ongoing RIF actions; furlough "savings"; and non-expenditure of the appropriated Tobacco Settlement Special Funds for the Healthy Start program.

#### **PART II - MEASURES OF EFFECTIVENESS**

- 7. The planned percent for both fiscal years should have been 1%; thus, there were no variances.
- 8. The program was able to reach only 10% of the total number of women who are of reproductive age, currently defined as women between the ages of 15-44 years. Temporary Assistance to Needy Families (TANF) funding was reduced and the program looked to serve those women with limited access to services based on age (teens) or insurance status. In addition, the loss of TANF funds impacted the numbers served. The program will make adjustments to the planned

percent for future years as it no longer counts mass media/public service announcements (PSAs) contacts, thereby resulting in lower counts/percentages.

9. For FY09 and FY10, the variances are due to the decrease in the number of children served under early intervention services. The decrease in funding for Healthy Start resulted in a decrease in the number of children served for this population; thereby impacting the overall percentage of children served between the ages of 0-3 years with developmental delays and biological/environmentally at risk served.

#### **PART III - PROGRAM TARGET GROUPS**

- 1. Note that the planned FY10 number should have read 700000 and therefore, there should be no variance.
- 2. The planned numbers were underestimated and does not reflect the most recent three year average of the uninsured rate which is approximately 96,500.
- 6. FY10: Due to the declining number of births, the actual eligible pregnant and post partum women were less than planned.
- 7. The variances are due to the utilization of a new reimbursement system that resulted in more accurate and complete data being collected. This number had been under reported in prior years due to POS contractors not reporting all live births.
- 8. The actual and estimate number of 248,900 is the estimated number of women in the State of Hawaii between the ages of 15-44 years (source: DBEDT, Hawaii Data Book).
- 9. The variances are due to the decrease of children served by the program because of a decrease in funding for Healthy Start, which resulted in programmatic changes that reduced the number of children screened as well as a change in criteria used to define the target group population.

PROGRAM TITLE: FAMILY HEALTH

05 01 05 HTH 560

10. The FY09 variance is due to budget restrictions and program closures. As funding has decreased, programmatic changes reduced the number of children screened and are considered at-risk.

#### **PART IV - PROGRAM ACTIVITIES**

- 2. The increased number includes combining primary care uninsured and women receiving services through the following DOH subsidized programs: Family Planning, Perinatal Support Services, Baby S.A.F.E., the Big Island Disparities Project and the Hawaii Healthy Mothers Healthy Babies organization. FY10 variance is larger because although it was planned to increase the activity, various cuts in funding caused the estimate to level off to the FY09 level.
- 5. The variances are due to poor economic conditions, thus, increasing the caseload with more participants receiving nutrition education and counseling.
- 6. The variance are due to poor economic conditions, thereby increasing the caseload resulting in distribution of prenatal/postpartum breastfeeding information to a higher percentage of WIC women than planned.
- 7. The planned number for FY09 should have been 2,680 (as for FY10). The variance in FY09 should have been 12% due to an over projection of the planned number.
- 8. The planned number in FY 09 shown as 4500 was an error and should have been 44,150. The variance between the 44,150 and the actual of 24,934 is due to a change in methodology of what the program is reporting. In prior years, the program mixed education encounters, presentations to live audiences and other classroom live presentations with poster and other media presentations (non-live presentation). The 24,934 reflects only live presentations which is a more accurate reflection of the prevention education POS efforts.
- 9. In FY 10, the decrease in funding for Healthy Start will result in a

decrease in the number of children served for this population and therefore will impact the overall number of children served.

10. In FY09, a total of 10,731 received services via POS contracts. As funding has decreased, programmatic changes will reduce the numbers served via POS contracts. It is anticipated that this number will decrease in future years. Note that the planned number should have been 9045.

PROGRAM TITLE: COMMUNITY HEALTH SERVICES

05 01 06 01 HTH 580

#### **PART I - EXPENDITURES AND POSITIONS**

FY 09: Expenditure variance is attributed in part to a collective bargaining augmentation of \$1.7M and offset by the following:

a)general fund transfer out of \$300k due to vacancies and a hiring freeze, b)postponement of a start-up program under the Temporary Assistance to Needy Families (TANF) project that encountered difficulties in identifying available funding to address the fronting of funding for expenditures in order to receive interdepartmental reimbursement from DHS, resulting in the non-receipt of funds towards \$1.15M TANF ceiling,

c)postponement of a start-up Tobacco Compliance program that encountered delays due to difficulties in identifying a source of matching funds (\$136,000 U), and d)postponement of a start-up Breast and Cervical Cancer Control program that encountered delays due to lack of funds transferred from DHS (\$150,000 U).

FY 10: For the first quarter, expenditures and encumbrances were less than budgeted due to not being able to fill 33 vacancies because of a hiring freeze. Expenditures for the fiscal year will also be less than budgeted primarily due to furlough savings and RIF positions in the various Community Health Division programs as well as the non-implementation of the TANF Project, Tobacco Compliance Program, Breast and Cervical Cancer Control Project with DHS, and the non-expenditure of funds from the Public Health Nursing Special Fund due to lack of revenues.

#### **PART II - MEASURES OF EFFECTIVENESS**

Item 7. Data not available.

#### **PART III - PROGRAM TARGET GROUPS**

Item 2. While FY 09 shows a 32% decrease from the planned number, the actual 1,014 is an increase from the FY 08 actual count of 840. For FY 10 estimates, the Public Health Nurses (PHNs) will continue with nursing referrals from hospitals and private medical doctors but will not be the designated care coordinator under IDEA Part C. As of July 1, 2009, coordination is being provided through Hawaii Keiki Information Service

System (HKISS). PHN management of key access sites for these families should more reasonably reflect the need for nursing services.

Item 4. While FY 09 shows a 45% decrease from the estimated, the 273 is a decrease of 12% from the FY 08 actual count of 311. This decrease is possibly due to the majority of child abuse clients not having significant health issues identified, thereby being referred by Child Protective Services/Department of Human Services instead to the Healthy Start and Enhanced Healthy Start programs. In the future, the referral process may change if there is available reimbursement for PHN child abuse and neglect case management services. For FY 10, PHN screening for elder abuse cases and select case management services may increase since budget cuts have occurred with elder protective services. The Public Health Nursing Branch is presently focusing on system development through carrying selected elder cases.

Item 5. The increase is due to the data criteria being used. The planned amount of 100 represents Hansen Disease (HD)/Other Communicable Disease (CD). The actual and estimated amounts reported represent a combined Tuberculosis, HD, and other CD, which accounts for the increase in FY 09 and FY 10.

#### **PART IV - PROGRAM ACTIVITIES**

Item 4. While FY 09 shows a 93% decrease from the planned number, the actual count of 335 is a 49% decrease from the previous year's actual count of 663. This decrease is possibly due to the majority of child abuse clients being referred to Healthy Start and Enhanced Healthy Start rather than PHNB.

Item 5. This decrease is due to TB Branch managing most of the Oahu investigation contacts. The need for PHN services statewide may increase with cuts to the TB program.

Items 6, 7, 9 and 10. The projected decrease in services to the public for FY 10 is a result of the 24 state staff furlough days per year. Staff will be unavailable during those days to engage in program services.

PROGRAM TITLE: TOBACCO SETTLEMENT

05 01 06 02 HTH 590

#### **PART I - EXPENDITURES AND POSITIONS**

FY 09: Positions were unfilled for various reasons including need for reorganization, a hiring freeze and resignations of staff throughout the year with the positions remaining vacant due to lack of approval to fill. The variance in expenditure versus budgeted was primarily due to \$3.2+ million in interdepartmental transfer for the SNAP-Ed program that was not realized, with the remaining \$454+k primarily from Tobacco Settlement Special Fund payroll savings.

FY 10: Most of the expenditure will occur in the fourth quarter when funds from the Master Settlement Agreement are deposited into the Tobacco Settlement Special Fund. Estimated expenditure is less than budgeted because of expected furlough savings.

#### **PART II - MEASURES OF EFFECTIVENESS**

Item 1. The FY 09 variance is attributable to the planned health weight rate probably being set too high as scientifically this is a long-term change in health status. Note that the actual most recent available data is from 2007 Behavioral Risk Factor Surveillance System (BRFSS) and the Youth Risk Behavior Survey (YRBS). In FY 10, this trend is expected to remain consistent with FY 09. The program is also waiting for the new national Healthy People (HP) 2020 goals that should reflect the national trends in obesity which are far higher than originally projected for HP2010. Using a 3 year average data analysis Hawaii ranks 47 in the nation for adults at healthy weight according to Trust for America (BRFSS).

Item 2. In FY 09, the planned healthy weight goal was not met probably due to the program not meeting with partners to engage in a more comprehensive, coordinated and intensive effort to turn the obesity epidemic. However, the 2009 YRBS shows a slight improvement in healthy weight for high school students from 2007 data (school health data is collected every other year).

Item 5. The Centers for Disease Control and Prevention (CDC) changed the recommendation for youth so the data for this measure is not available and needs to change to 60 minutes of moderate to vigorous physical activity 5+ days/week. 60 minutes of physical activity for high school students remained stable at 34.3% from 2007 to 34.4% 2009, and for middle school students increased from 40.4% to 44.8%.

Items 6 & 7. These two measures should probably have been combined as 5 or + daily servings; when 'planned' are combined as a consolidated measure; 28.6% of adults reported consuming 5 or more servings of fruits and vegetables per day (source: BRFSS 2007-note: fruit and vegetable consumption questions are only asked every 2 years in the BRFSS.)

Item 8. For FY 10, the "planned" percentage should be equal to the national objective of 15%; HP 2010 objective is 15%. As of 2009, the BRFSS reported adult smoking in Hawaii at 15.4%.

Item 9. The actual and estimated percentages exceeded the national objectives. Smoking rates for youth are influenced by comprehensive tobacco prevention and control programs which in Hawaii includes high cigarette taxes, smoke free establishment policies, effective comprehensive cessation and prevention programs, and social norm campaigns.

#### **PART III - PROGRAM TARGET GROUPS**

No major variances for the target groups.

#### PART IV - PROGRAM ACTIVITIES

Item 1. The variances are due primarily because planned booster social marketing campaigns in FY 09 and new campaign messages in FY 10 were not approved for implementation.

Item 3. The variance in FY 10 is attributable to FY 09 contracts that were awarded but took longer than usual to execute, resulting in delays for the selected communities conducting policy, systems and environmental change interventions.

#### PROGRAM TITLE: TOBACCO SETTLEMENT

05 01 06 02 HTH 590

- Item 4. The actual number reached exceeded plans by 399% because the SNAP-Ed program increased its reach into the low income Kalihi community and it was well received by the Pacific Islander population. The growth is expected to continue through FY10 with the addition of new project sites that are reaching the low income population of children and families with nutrition education.
- Item 5. The 72% variance in FY 09 was due to more teachers signing up for the trainings than anticipated.
- Item 6. The estimates went below "planned" as the program was scaled back due to a late approval of the contract with UH to develop the tools and conduct physician trainings.
- Item 7. Inclusion of new raw data sets were delayed due to the time required to develop the www.hawaiihealthmatters.org site that provides a broader array of data from labor, education, public safety, etc. to help readers understand that various factors interact to influence the health status of residents. This constitutes more data being available through the HHDW Project but was done without the addition of new data sets being stored in the data warehouse.
- Item 8. The FY09 and FY 10 variances are due to the addition of an epidemiologist who is increasing report volume based on requests by report users and to meet the needs of public health constituents and decision makers.
- Item 9. The number of users at the report creator level had not increased as planned so starting in FY09, the Healthy Hawaii Initiative program has changed its practice to increase production of standard reports instead of expecting dramatic increase in users who analyze and create their own reports. The analytics used to measure visits to the HHDW sites do not distinguish the origin of the viewer. Visits have gone up substantially with the addition of the HHDW.org and hawaiihealthmatters.org site which provide already analyzed and formatted data into tables and trend charts and within a comprehensive context of data, program information, current

research and news, and related data.

Item 10. The variances are due to an increase in information governance structure taking longer than expected because of due process required for policy review and competing priorities on staff.

#### PROGRAM TITLE: HEALTH RESOURCES ADMINISTRATION

05 01 07 HTH 595

#### **PART I - EXPENDITURES AND POSITIONS**

The position variances are due to the vacant Deputy Director of Health Resources Administration.

- FY 09: The expenditure variance is due to a collective bargaining adjustment and transfer of funds to restore a 4% legislative reduction of other current expenses.
- FY 10: The expenditure variance for both the first quarter and the remaining three quarters are due to the fact that the special fund appropriated for respite will not be expended and estimated furlough savings.

#### **PART II - MEASURES OF EFFECTIVENESS**

Item 1. Please see the variance reports for each of the Health Resource Administration programs for the explanations pertaining to each MOE for FY 09.

#### **PART III - PROGRAM TARGET GROUPS**

- Item 1. The variances are due to personnel vacancies in Health Resources Administration and reduction in force actions during FY 10.
- Item 2. The variances are due to vacancies and, in FY 10 due to reduction in force actions.

#### **PART IV - PROGRAM ACTIVITIES**

Not applicable.

### PROGRAM TITLE: HAWAII HEALTH SYSTEMS CORP - CORP OFFICE

05 02 01 HTH 210

#### **PART I - EXPENDITURES AND POSITIONS**

The variance in expenditure in FY 09 can be attributed to the collective bargaining allocation.

The variance in expenditure in FY 10 is primarily due to the restriction for the furlough savings.

#### **PART II - MEASURES OF EFFECTIVENESS**

Item 1. The increase in the average operating cost per patient day is due to the actual operating expenses for fiscal year 2009 included a \$35.5 million adjustment to increase operating expenses because of the Other Post Employment Benefits (OPEB) allocation to HHSC from the State of Hawaii. This adjustment was not included in the budgeted amount because HHSC does not know its share of the OPEB allocation until after the fiscal year ends.

FY 10 - NO DATA. In the 2009 Legislature, the Hawaii Health Systems Corporation was restructured to separate the Corporate Office and the Regions. The Corporate Office retained HTH 210 and HTH 212 was assigned to the Regions.

#### **PART III - PROGRAM TARGET GROUPS**

No significant variances in FY 09.

FY 10 - NO DATA. In the 2009 Legislature, the Hawaii Health Systems Corporation was restructured to separate the Corporate Office and the Regions. The Corporate Office retained HTH 210 and HTH 212 was assigned to the Regions.

#### **PART IV - PROGRAM ACTIVITIES**

Item 4: The variance from budget is due to higher long-term care admissions at Hilo Medical Center, Kona Community Hospital, and Leahi Hospital. Budgeted admissions for FY 09 were based on actual admissions for FY 08, and actual results came in higher due to increased

demand for long-term care beds on the islands of Hawaii and Oahu as the population continues to age and there is an insufficient supply of longterm care beds in the state of Hawaii.

Item 6. The positive variance in emergency room visits is reflective of a statewide trend. As the Hawaii economy worsens the utilization of emergency rooms by those without insurance has increased substantially. Also, recent renovations to the emergency rooms at Hilo Medical Center and Maui Memorial Medical Center have increased the capacity of those facilities to receive and treat emergency room patients.

FY 10 - NO DATA. In the 2009 Legislature, the Hawaii Health Systems Corporation was restructured to separate the Corporate Office and the Regions. The Corporate Office retained HTH 210 and HTH 212 was assigned to the Regions.

#### **PART I - EXPENDITURES AND POSITIONS**

to capacity (99%).

No significant variances.

#### **PART II - MEASURES OF EFFECTIVENESS**

Items 1 and 3. The variances in FY 09 and FY 10 can be attributed to patients, admitted to Acute/Swing beds by the community physicians, requiring longer stays because of acuity and/or medical complications.

Item 4. The variances in FY 09 and FY 10 are due to lower length of stays as a result of transfers to tertiary hospitals or alternative community residential settings. Historically, patients/residents in long term care require longer stays.

Item 5. The variance in FY 10 is due to patient/resident's acuity and higher ER utilization that lead to higher cost per patient day as tests, procedures, drugs and supplies are heavily utilized for therapy and diagnostic requirements.

#### **PART III - PROGRAM TARGET GROUPS**

No significant variances.

### **PART IV - PROGRAM ACTIVITIES**

Items 1 and 2. The variances can be attributed to community physicians not admitting patients to the hospital. Also the remoteness/distance of the facility is a challenge in enticing families to admit their loved ones.

Item 3. The variances in FY 09 and FY 10 are due to the visibility and constant involvement in community activities that have put the facility in the forefront. Coupled with acquiring new equipment, updated technology and expertise have resulted in higher utilization.

Item 4. The variance in FY 09 is due to limited/restricted admissions. The variance in FY 10 is due to the shorter length of stay of some admissions allowing for the increase in admission. Beds are being filled

PROGRAM TITLE: HAWAII HEALTH SYSTEMS CORPORATION - REGIONS

05 02 03 HTH 212

## **PART I - EXPENDITURES AND POSITIONS**

The expenditure variances in FY 2010 are primarily due to the restriction for the furlough savings.

## **PART II - MEASURES OF EFFECTIVENESS**

This is a new program ID established by the 2009 Legislature; as such, no measures of effectiveness are available for this program.

## **PART III - PROGRAM TARGET GROUPS**

This is a new program ID established by the 2009 Legislature; as such, no program target groups are available for this program.

## **PART IV - PROGRAM ACTIVITIES**

This is a new program ID established by the 2009 Legislature, as such, no program activities are available for this program.

PROGRAM TITLE: ADULT MENTAL HEALTH - OUTPATIENT

05 03 01 HTH 420

### **PART I - EXPENDITURES AND POSITIONS**

FY08-09: The expenditure variance is attributed to a reduction in revenue collected and the resulting decrease in special fund expenditures.

FY09-10: The position and expenditure variances are attributed to the furlough and reduction-in-force, and a reduction in revenue collected and the resulting decrease in special fund expenditures.

### **PART II - MEASURES OF EFFECTIVENESS**

- 1., 2., 3. Data is not available because the assessment tool currently being used no longer reports a determination of functional level.
- 4. FY 08-09, FY 09-10: The variances are attributed to the increase in the number of consumers living independently without any supervision.
- 5. FY 08-09, FY 09-10: The variances are due to increased success in identifying consumers needing housing through outreach.
- 6. FY 08-09, FY 09-10: The variances are due to an increase in interest from consumers to find and maintain employment.

### **PART III - PROGRAM TARGET GROUPS**

- 1. FY 08-09, FY 09-10: The variances are due to the change in the Adult Mental Health Division's eligibility criteria and the shifting of consumers with health insurance back to their health plans.
- 2. FY 08-09: The planned figure was omitted. The variance reflects the actual figure. FY 09-10: The variance may be attributed to a difference in the definitions used to determine consumers with acute mental health crisis.

### **PART IV - PROGRAM ACTIVITIES**

- 1. FY 08-09, FY 09-10: The variances are due to a change in the definition of outpatient services to now include consumers served by the Community Mental Health Centers and Purchase of Service providers.
- 2. FY 08-09: The planned figure was omitted. The variance reflects the actual figure. FY 09-10: This contracted service is no longer purchased.
- 3. FY 08-09, FY 09-10: The variances are due to a change in the measurement of the activity to only reflect the average number of consumers served each day.
- 4. FY 08-09: The planned figure was omitted. The variance reflects the actual figure. FY 09-10: The variance is due to a change in the definition of new admissions to reflect admissions to each level of service.
- 5. FY 08-09: The planned figure was omitted. The variance reflects the actual figure. FY 09-10: The variance is due to a change in the definition of discharges to reflect discharges from each level of service.
- 6. FY 08-09: The planned figure was omitted. The variance reflects the actual figure. FY 09-10: The variance is due to a change in the measurement of the activity to include total individuals placed in community housing rather than only new admissions.
- 7. FY 08-09: The variance is due to a change in the definition of crisis intervention services to only include individuals served by Purchase of Service providers.

PROGRAM TITLE: ADULT MENTAL HEALTH - INPATIENT

05 03 02 HTH 430

## **PART I - EXPENDITURES AND POSITIONS**

FY 08-09: The expenditure variance was due to the transfer of funds from other programs to cover unbudgeted expenditures caused by the increasing patient census at the hospital.

FY 09-10 (9-mos. ended): The estimated expenditure variance is due to furloughs and the reduction in force.

### **PART II - MEASURES OF EFFECTIVENESS**

- 1. FY 09-10: The variance is likely due to more individuals being discharged to specialized residential services rather than to the community, as there is increased capacity at this time and courts tend to favor specialized placements over unstructured or less structured community placements.
- 2. FY 08-09, FY 09-10: The variance may be attributed to challenges for case management agencies to provide the specific type and amount of services that would have resulted in longer tenure in the community.

### PART III - PROGRAM TARGET GROUPS

- 1. FY 09-10: The variance is primarily attributed to the courts determining a greater number of individuals "unfit to proceed" and sending them to the Hawaii State Hospital. This reason is primarily causative for the increased number of admissions and increased census in the hospital in this fiscal year.
- 2. FY 08-09, FY 09-10: The variance is attributed to more individuals being admitted on legal holds rather than by civil commitments. Due to the lack of capacity in the hospital stemming from the large number of penal commitments, there is insufficient capacity for community civil commitments.

### **PART IV - PROGRAM ACTIVITIES**

- 1. FY 08-09, FY 09-10: The variance is due to larger numbers of patients identified as being at risk of hospitalization and being placed into community or diversion programs.
- 2. FY 09-10: The variance is attributed to the challenges faced by individuals with severe and persistent mental illness who are on conditional release and living a safe, sober, medication-adherent life in the community. Such individuals are readmitted for either a new charge or a violation of their conditional release. It is assessed that as resources available in the community become more scarce, individuals who are at risk of being readmitted behave in a manner consistent with that outcome occurring.
- 3. FY 08-09: The variance is due to increasing difficulty finding appropriate community placement options and court factors that are relevant once a patient is clinically ready for discharge. FY 09-10: The variance is due to the need to treat and discharge the increased number of individuals admitted to the hospital.
- 4. FY 08-09: The variance is due to more programmatic and diversion options being available in the community, resulting in a decrease in forensic/court-ordered admissions. FY 09-10: As virtually every Hawaii State Hospital admission is court ordered and the number of admissions is going up, the variance is explained by the increased number of admissions and the fact that very few voluntary or community admissions can be accepted due to space limitations.
- 5. FY 09-10: The variance is explained by the increased number of admissions to the hospital and a rising census. As more newly-admitted patients are stabilized on the acute unit, they are transferred to the rehabilitation units to complete their course of treatment.

PROGRAM TITLE: ALCOHOL & DRUG ABUSE

05 03 03 HTH 440

### **PART I - EXPENDITURES AND POSITIONS**

In FY 09, there was less expended than budgeted primarily due to the late startup of a federal grant, and several general and federal funded position vacancies throughout the fiscal year.

In the first quarter of FY 10, several service contracts were not executed as anticipated. The Alcohol and Drug Abuse Division (ADAD) expects that these contracts will be encumbered in the second quarter. Also the overall net expenditures for FY 10 is less about \$170+k in estimated furlough savings.

### **PART II - MEASURES OF EFFECTIVENESS**

Item 2. Variances are primarily due to the continued efforts to provide culturally relevant treatment and prevention services across the state. Since a large percentage of individuals admitted to substance abuse treatment programs are Native Hawaiian, treatment programs have increased the number of activities that are designed specifically for them. These efforts have attracted more Native Hawaiian individuals into substance abuse treatment services and have contributed to greater numbers of individuals successfully completing services.

Item 3. Variances are primarily due to the decreasing numbers and aging of the injection drug user (IDU) population. It is important to note that as individuals mature, at-risk behaviors such as substance abuse generally decrease which may have contributed to the increase in treatment completion rates.

Item 7. For FY 10, the planned number should have read "20" instead of "25", and therefore, there should not have been any variance.

Item 8. Variances are primarily due to the inclusion of addiction studies coursework at the community college level statewide and more workshops targeting specific substance abuse treatment skill areas. Due to the availability of additional substance abuse related educational and training opportunities, certification examinees were better prepared and

the pass rate on the examination improved. The elimination of the oral examination, the development of a more comprehensive written examination as well as an increase in the number of examination opportunities offered during the year streamlined the overall certification process and also contributed to the increase in the number of individuals obtaining their certification.

Item 9. Variances are primarily due to community-based planning efforts that had placed a greater emphasis on changing community norms, increasing public awareness of substance abuse prevention, and encouraging participation in drug-free events.

Item 10. The slight increase noted in FY 09 was reflective of the continued successful efforts of the University of Hawaii (UH) - Cancer Research Center of Hawaii (CRCH) and county police departments across the state that operationalized the underage tobacco enforcement efforts supported by the ADAD.

### **PART III - PROGRAM TARGET GROUPS**

- Item 1. The "planned" figures were based on the needs assessments from the 1998 Adult Household Survey and the 2003 Student Survey. The "actual" and "estimated" figures were based on the 2004 Adult Household Survey and the 2003 Student Survey which indicate that approximately 93,294 adults and adolescents in need of substance abuse treatment services.
- Item 2. The "planned" figures were based on the number of service contracts that were supported by historical funding levels and does not account for increases in specific appropriations to provide additional substance abuse prevention and treatment services.
- Item 3. Variances noted are directly related to the filling of a vacant Training Coordinator position within the ADAD; and who expanded efforts and thus significantly increased the number of training opportunities in which participants could enroll.

PROGRAM TITLE: ALCOHOL & DRUG ABUSE

05 03 03 HTH 440

- Item 4. Variances are related to the increased number of private for-profit treatment providers that required accreditation and licensing. The number of agencies interested in establishing therapeutic living programs also increased, which required programs to meet accreditation standards and to obtain their license to operate.
- Item 5. Variances appear to be driven by: the increased demand for Certified Substance Abuse Counselors (CSACs) in the behavioral health field to provide clinical services in various treatment programs; a significant increase in the number of newly-established CSAC positions, specifically the statewide adolescent school-based substance abuse treatment services that required staff to be certified; the inclusion of addiction studies coursework at the community college level generating increased interest in the substance abuse counseling field as a viable career option; and the growing number of professionals with master and bachelor degrees who were interested in obtaining certification to supplement their current training and credentials in order to provide clinical services.
- Item 6. The "planned" figures were based primarily on census data that was available when the initial performance measures were established. The "actual" and "estimated" figures are based on the 2008 American Community Survey Estimates from the U.S. Census Bureau.
- Item 7. The "planned" figures were based on the number of tobacco vendors that were in existence when the initial performance measures were established. The "actual" and "estimated" data are based on current number of licensed tobacco vendors statewide. It is important to note that law enforcement operations visited all known tobacco outlets. Outlets may have been visited more than once which may have duplicated the count of tobacco vendors.

### **PART IV - PROGRAM ACTIVITIES**

Item 1. The variance in FY 09 was primarily due to the increased number of persons receiving services through school-based treatment programs in middle schools and adolescent community-based programs. The

- various adolescent programs statewide, which are fairly new services, were more fully-staffed and better known in the community which increased the overall number of service referrals during the year.
- Item 2. Variances are due to continued efforts to streamline the number of substance abuse treatment and prevention contracts with service providers statewide. Efforts to combine various treatment service modalities and multiple prevention service sites within fewer numbers of contracts afforded additional efficiencies, flexibility and better management of limited program resources.
- Item 3. Variances are due to a significant increase in the number of workshops, trainings and conferences that provided Continuing Education Units (CEUs) approved by ADAD. It is important to note that the "planned" activity level was based on individuals earning CEUs from DOH sponsored training events only, as ADAD had previously been the primary sponsor of substance abuse related trainings within the state. As substance abuse related trainings have expanded to other health and human service areas, ADAD increased the number of CEUs offered to a broader range of training events in the community and across the state.
- Item 4. Variances are related to the increased number of private, forprofit treatment providers that entered the state as well as agencies interested in establishing therapeutic living programs which resulted in increased need to meet accreditation standards and licensure requirements.
- Item 5. The variances appear to be driven by several factors including: the increased demand for CSACs in the behavioral health field to provide clinical services in various treatment programs; a significant increase in the number of newly established substance abuse treatment programs, specifically the statewide adolescent school-based substance abuse treatment services that require staff to be certified; and the growing number of professionals with master and bachelor degrees interested in obtaining their certification in order to provide clinical services. These factors directly contribute to the significant increase in the number of new

## PROGRAM TITLE: ALCOHOL & DRUG ABUSE

05 03 03 HTH 440

and renewal certification applications.

Item 6. The original FY 09 "planned" number was based on the total of both a written and oral examination. The variance is primarily due to elimination of the oral examination portion (effective June 26, 2008). The FY 10 "estimate" is based on the actual for FY 09.

Item 7. The FY 09 variance is attributable to the increased number of community-based organizations that provide prevention services to youth, families and the elderly. The adoption of this broader targeted prevention population contributed to a larger number of individuals receiving prevention services across the state. And although in FY 10, the "planned" number was supposed to go up because of increased resources for prevention services, with its reduction due to the recession, it is estimated that it will remain at approximately the same level as the FY 09 "actual".

Item 8. The "planned" figures were initially based on a statewide sampling of randomly selected outlets that sell tobacco to minors in accordance with the 1992 federal law known as the Synar Amendment. To provide a more accurate assessment and impact of the overall underage tobacco efforts, the "actual" and "estimated" numbers were based on year-round law enforcement operations with the UH-CRCH and county police departments statewide. Enforcement operations were based on targeting all retail outlets, rather than a smaller statewide sampling, making it a more comprehensive and larger scale effort.

PROGRAM TITLE: CHILD & ADOLESCENT MENTAL HEALTH

05 03 04 HTH 460

### **PART I - EXPENDITURES AND POSITIONS**

### FY 2008-2009:

The variance in position count to positions filled is due to a difficulty in getting qualified applicants on the lists and receiving the lists in a timely manner.

### FY 2009-2010:

Hiring freeze imposed as of July 15, 2009. The anticipated vacancies for FY10 are due to the hiring freeze and employees resigning during and after the RIF that was finalized in December of 2009.

### **PART II - MEASURES OF EFFECTIVENESS**

- 1. The increase in the percentage is due to a negligible increase in newly registered clients. Had the number of registered clients increased at the levels planned, the percentage of registered clients admitted to residential programs as part of CAMHD's registered client base would have been nearer to the 15% as anticipated.
- 2. Average length of stay (days) children/youth are in a residential program decreased due to improved utilization management by CAMHD. The youth whose length of stay exceed the established norms were brought down closer to the standard.
- 4. The variance in the percentage of direct service for which federal reimbursement was received is partially due to the fact that the CAMHD could not bill for some of the services that were provided. Acute Hospitalization, could not be reimbursed as the service did not qualify as a billable service by DHS in FY 09. The CAMHD is required to work directly with the QUEST plans for FY 10 and anticipates that the reimbursements will be at the levels projected.
- 6. For FY 10 the decrease in clients with service mismatch is due to better planning for the clients and placing them in an appropriate level of service. The FY 10 data should be identical to the FY 09 data in that no changes to planning are expected to occur.

- 7. FY 09 marked the last year of DOE reviews to examine the performance of local service systems providing services and supports for students with special needs. The monitoring process will be conducted internally through the General Supervision and Support Process. For FY 10 the Department of Education is no longer conducting Internal/External Performance Reviews of the Education Complexes. The measure for FY 10 is thus not applicable.
- 9. The number of hours devoted to staff training and development in evidence-based services was reduced due to lack of funds for trainings and related travel. In addition, the CAMHD will be using the telehealth equipment placed into the Family Guidance Centers to help facilitate the trainings and cut down on the costs.
- 10. The number of hours devoted to provider training and development in evidence-based services was reduced due to lack of funds for trainings and related travel. Due to this lack of funding, we are working more towards a train-the-trainer approach to decrease our cost. Trainings were decreased in number while simultaneously attendance was increased, i.e. 2 trainings for 10 was changed to 1 training for 20. In addition, the CAMHD will be using the telehealth equipment placed into the Family Guidance Centers to help facilitate the trainings and cut down on the costs.

### **PART III - PROGRAM TARGET GROUPS**

No significant variances

### **PART IV - PROGRAM ACTIVITIES**

6., 7. The number of hours devoted to staff training/development and provider training was reduced due to lack of funds for trainings and related travel. In addition, the CAMHD will be using the telehealth equipment placed into the Family Guidance Centers to help facilitate the trainings and cut down on the costs.

### PROGRAM TITLE: BEHAVIORAL HEALTH ADMINISTRATION

05 03 05 HTH 495

### **PART I - EXPENDITURES AND POSITIONS**

FY08-09: At the end of FY 08-09, there were 16.00 vacant positions; 4.00 positions were not established, 10.00 positions were under recruitment, and 2.0 positions needed to be redescribed.

FY09-10: The position variance at the end of the fiscal year will be caused by the deletion of reduction-in-force positions due to the lack of funds.

### **PART II - MEASURES OF EFFECTIVENESS**

1. FY 09-10: The variance is the result of the lack of sufficient, qualified staff to conduct on-site monitoring of purchase of service programs on an annual basis.

### **PART III - PROGRAM TARGET GROUPS**

- 2. FY 08-09, FY 09-10: The variance is due to the change in the Adult Mental Health Division's eligibility criteria and the shifting of consumers with health insurance back to their health plans.
- 3. FY 09-10: The increase in the number of purchase of service programs in both fiscal years is the result of attempting to contract with more programs instead of relying on a few programs to provide most of the contacted services.

### **PART IV - PROGRAM ACTIVITIES**

No significant variance.

**ENVIRONMENTAL HEALTH**

### PROGRAM TITLE: ENVIRONMENTAL HEALTH SERVICES

05 04 01 HTH 610

## **PART I - EXPENDITURES AND POSITIONS**

Variance in FY 2009 AND FY 2010 positions and expenditures is due to vacancies, furloughs, restrictions, and the impact of the recession.

## **PART II - MEASURES OF EFFECTIVENESS**

Item 2: For FY 2010, with a Reduction-in-Force (RIF) of over 64% of the Vector Control Branch, estimated figures are unknown.

Item 3: The 100% decrease for FY 2009 reflect fewer human cases of vector-borne diseases resulting in fewer mammals trapped. For FY 2010, with a Reduction-in-Force (RIF) of over 64% of the Vector Control Branch, estimated figures are unknown.

Item 4: For FY 2010, with a Reduction-in-Force (RIF) of over 64% of the Vector Control Branch, estimated figures are unknown.

Item 6: The 74% decrease for FY 2010 reflects a change in criteria for "meets standard" from simply having a food establishment (FE) permit to the number of food establishments inspected on a routine basis that have no food-borne illness risk factors.

Item 7: The 10% decrease in complaints responded to within 2 days is due the current workload ratios and the difficulties in filling vacant sanitarian positions.

Item 9: The 18% decrease in the percentage of radiation facilities in compliance is due to the number of facilities that have not been inspected within the prescribed frequency due to limited manpower.

Item 10: The 25% decrease in compliance for FY 2009 is due to a change in which food safety inspections are conducted. Previously inspections were based on Chapter 12, HAR (Sanitation Rules). However in 2008 the Food and Drug Branch returned back to conducting inspections based on

Chapter 328, HRS and Chapter 29, HAR; statute and rule that the program was originally created to enforce. Regulated firms are adjusting to the change in focus and expectations. Through education and guidance firms will become more familiar with the regulations and the compliance rate is expected to rise. The same is expected in FY 2010.

### **PART III - PROGRAM TARGET GROUPS**

Item 2: The 39% decrease in FY 2009 reflects an updated database of mosquito breeding sites and corrected information. For FY 2010, with a Reduction-in-Force (RIF) of over 64% of the Vector Control Branch, estimated figures are unknown.

Item 3: The 58% decrease in FY 2009 reflects fewer cases of vector-borne diseases resulting in fewer mammals tested. For FY 2010, with a Reduction-in-Force (RIF) of over 64% of the Vector Control Branch, estimated figures are unknown.

Item 4: For FY 2010, with a Reduction -in-Force of over 64% of the Vector Control Branch estimated figures are unknown.

Item 5: The 18% increase in FY 2009 is due to an effort to collect more food product samples to re-start the monitoring program aimed at detecting contaminated or adulterated food. The 47% decrease in FY 2010 is due to the current round of layoffs which occurred in the Food Microbiology section of State Laboratory Division. No microbiological testing of food product samples can be done; only chemical analysis can be done. With the severity of the budget restrictions, it is not known whether the program will have sufficient resources to pay for microbial analysis of suspected adulterated food products through an outside laboratory.

### PROGRAM TITLE: ENVIRONMENTAL HEALTH SERVICES

05 04 01 HTH 610

- Item 6: The 10% decrease in number of food service Establishments reflect food Establishment closures that occurred with the economic down turn in FY2009.
- Item 7: The decreases in FY 2009 and FY 2010 in the number of complaints received by the Sanitation can not be fully explained. The planned or estimated number in future Variance Reports will need to be adjusted to more accurately reflect program efforts.
- Item 8: The 16% increase in the number of noise permits issued in FY 2009 reflect more construction projects in the community.

Item 10: The decreases in FY 2009 and FY 2010 are based on inaccurate planned numbers. In FY 2009, the actual number of food manufacturers and distributors is 935 but the total number of firms regulated by the Food and Drug Branch is closer to 1700. In FY 2010 the total number of firms regulated by the Branch has increased to 2000. The planned numbers in future Variance Reports will need to be adjusted to more accurately reflect the actual number of establishments.

### **PART IV - PROGRAM ACTIVITIES**

- Item 2: The explanation for the 151% increase of actual over planned mosquito breeding sites inspected/treated in FY 2009 is not available because of the departure of Vector Control Branch management staff due to the Reduction-in-Force. For FY 2010, with a Reduction-in-Force (RIF) of over 64% of the Vector Control Branch, estimated figures are unknown.
- Item 3: The 43% decrease in FY 2009 reflects fewer human cases of vector-borne diseases resulting in fewer surveys conducted. For FY 2010, with a Reduction-in-Force (RIF) of over 64% of the Vector Control Branch, estimated figures are unknown.

- Item 4: The decrease in FY 2009 is due to a drop in the number of service requests and therefore fewer inspections. For FY 2010, with a Reduction-in-Force (RIF) of over 64% of the Vector Control Branch, estimated figures are unknown.
- Item 5: The 52% decrease in FY 2010 is due to the current round of layoffs which occurred in the Food Microbiology section of State Laboratory Division. No microbiological testing of food product samples can be done; only chemical analysis can be done. With the severity of the budget restrictions, it is not known whether the program will have sufficient resources to pay for microbial analysis of suspected adulterated food products through an outside laboratory.
- Item 6: The 17% decrease in FY 2010 is due to retirements and the inability to fill vacant positions as well as the acquisition of new personnel from the reduction-in-force process that have not been fully trained to conduct unsupervised inspections.
- Item 7: The decrease in FY 2010 reflects the projected decrease in the number of complaints received. The planned or estimated number in future Variance Reports will need to be adjusted to more accurately reflect program efforts.
- Item 8: The 16% decrease in FY 2009 in noise permit inspections reflects the diversion of staff to focus primarily on the review and process of the increased number of noise permits applications instead of permit inspections.
- Item 10: The decreases in FY 2009 and FY 2010 between planned and actual are due to inappropriate planned numbers. The planned numbers reflect the total number of firm regulated by the Food and Drug Branch instead of only food manufacturers and distribution facilities to be inspected as identified by the measure. The actual numbers reported FY 2009 and FY 2010 more accurately reflect the number of food manufacturer and distributors inspected.

PROGRAM TITLE: STATE LABORATORY SERVICES

05 04 02 HTH 710

### **PART I - EXPENDITURES AND POSITIONS**

### FY 2008-09

There were nine positions vacant at the end of the fiscal year 2009. Five positions were abolished by the legislature at the end of FY 2009. The remaining four were chronically vacant due to recruitment challenges because of an inability to revise outdated position classification with contemporary responsibilities and compensation. Funds that were appropriated to purchase replacement laboratory equipment were not released.

### FY 2009-10

There were four vacant positions in the first quarter due to retirement, resignation and difficulties in recruitment. Ten (10) positions were lost to Reduction-in-Force (RIF).

## **PART II - MEASURES OF EFFECTIVENESS**

No significant variance.

### **PART III - PROGRAM TARGET GROUPS**

No significant variance.

### **PART IV - PROGRAM ACTIVITIES**

- 2. The variance in FY 2010 is due to the decrease in the total maximum daily load (TMDL) samples submitted from the Environmental Planning Office because of loss of sampling staff through RIF.
- 4. Variance for both years was due to suspended TB services following loss of vacant positions due to legislative cuts. The State Laboratory is evaluating the need for future TB testing. FY 10 "planned" is an error and should be 5,000.
- 5. Variances for both years was due to Virology Section transitioning to more advanced PCR testing for influenza. This molecular testing can be

performed more efficiently than the more labor-intensive viral culture methodology using tissue culture, so Virology effectively performed more tests in less time.

- 6. FY 2010 Reduction-in-Force (RIF) eliminated the Food and Dairy Unit of the Environmental Microbiology Section and one food Chemist. Some Food & Drug Branch inspection staff were also lost to RIF. Variance is due to a decrease in the number of samples that were submitted by Food & Drug Branch for analysis and the lack of laboratory staff to do the testing.
- 7. FY 2009 variance was due to the shut down of the Makaiwa station for sulfur dioxide and meteorological measurements, and cessation of the Kihei station's continuous monitoring of 10 micron particulates.
- 9. Variance due to the increased number of workshops that are offered via long distance (satellite) training programs & video conferences sponsored through the National Laboratory Training Network and other federal funded programs.

### PROGRAM TITLE: HEALTH CARE ASSURANCE

05 04 03 HTH 720

### **PART I - EXPENDITURES AND POSITIONS**

Variance in position is due to vacancies and difficulty in recruiting and filling positions due to budget policy.

Variance in expenditures due to vacancies, salary savings due to the furlough and restrictions.

### **PART II - MEASURES OF EFFECTIVENESS**

No significant variances.

## **PART III - PROGRAM TARGET GROUPS**

For FY 09 the variances in planned to actual numbers were difficult to project and resulted in either over- or under-estimates; other factors include voluntary termination of state license, and increases in new Medicare approved facilities. These terminations and approvals contributed to under- and over-estimates.

- 4. All facilities were surveyed in accordance with state law. Fewer facilities were operating during this time than anticipated.
- 7. Additional facilities were approved to participate in the Medicare/Medicaid programs.
- Additional visits were required for new DD homes.
- 9. Additional facilities were approved to participate in the Medicare/Medicaid programs.

For FY 09 several of the planned numbers were over-estimates or underestimates that were difficult to project while other planned numbers reflect a voluntary termination of licensure or an increase in the number of health care providers.

- 1. Additional resources were available that increased the ability to complete state licensing and/or federal certification survey activities.
- 2. The planned number for both years is an over estimate. Based on current resources we estimate to conduct about the same number of visits as FY 09.
- 3. The planned estimate was a gross over-estimate based on anticipated multiple annual visits for each facility, which were not needed.
- 4. The planned estimate was a gross over-estimate based on anticipated multiple annual visits for each facility, which were not needed.
- 5. The planned estimate was an over-estimate.
- 7. The visit of 1 facility was moved from FY 09 to FY 10 and did not jeopardize any residents.
- 8. The planned number for both years is an under estimate. Based on current resources, we estimate to conduct about the same number of visits as FY 09.
- 9. New home health agencies were approved for licensure and/or Medicare/Medicaid participation.
- 10. No data is readily available for FY 09 and it would be speculative to estimate the amount of activity for FY 10.

## PROGRAM TITLE: STATE HEALTH PLANNING & DEVELOPMENT AGENCY

05 05 01 HTH 906

## **PART I - EXPENDITURES AND POSITIONS**

FY 2008-2009 Variance: Travel by SHPDA staff, SHCC members, and Certificate of Need (CON) Review Panel members to Maui, Kauai, and Hawaii Counties was not as robust as predicted for FY2008-2009 due to downturn in the number of CON application fillings.

FY 2009-2010 first quarter variance due to budget restrictions and travel restrictions imposed during this quarter.

## **PART II - MEASURES OF EFFECTIVENESS**

No variance.

## **PART III - PROGRAM TARGET GROUPS**

No variance.

### **PART IV - PROGRAM ACTIVITIES**

No variance.

PROGRAM TITLE: HEALTH STATUS MONITORING

05 05 02 HTH 760

### **PART I - EXPENDITURES AND POSITIONS**

Variance in expenditures in FY09 and FY10 is due to delays in the special fund expenditures for the implementation of the planned Electronic Marriage Registration system. Expenditures were also reduced due to furlough savings.

### **PART II - MEASURES OF EFFECTIVENESS**

#1.The increase in the % Vital Records issued within 10 days of request is due to the filling of several vacant Vital records positions.

#2. The increase in the completed interviews is due to better phone number verifications by the Office of Health Status Monitoring and Hawaiian Telecom which reduced the number unsuccessful calls.

## **PART III - PROGRAM TARGET GROUPS**

No significant variance.

### **PART IV - PROGRAM ACTIVITIES**

- #1. The increased number of fulfilled requests reflect an increase in the number of research projects conducted nationally and locally, which needs the assistance of the Office of Health Status Monitoring.
- #2. The decrease in the estimated number of households interviewed in the healthy survey for FY10 is due to a budget reduction in the survey contract as a result of ACT 162/2009.

### PROGRAM TITLE: DEVELOPMENTAL DISABILITIES COUNCIL

05 05 03 HTH 905

### **PART I - EXPENDITURES AND POSITIONS**

Expenditures: The variance for the budgeted and actual expenditure amounts for FY 2008-09 is due to savings from three vacant positions (2 permanent and 1 temporary) and operating costs for the self-advocacy network.

Positions: The variance for positions budgeted (8.00) and actual (6.50) was due to the vacancy of the Planner V (Pos. #23434) and Account Clerk III (Pos. #23433) positions.

### **PART II - MEASURES OF EFFECTIVENESS**

No significant variances

### **PART III - PROGRAM TARGET GROUPS**

No significant variances

### **PART IV - PROGRAM ACTIVITIES**

Item 1. The variance of the planned 500 to the actual 1,263 individuals/family members participating in public awareness, education and training is due to an increase in the number of individuals participating in the neighbor island DD committees' Legislative Forums during the 2nd quarter, and additional events in the 3rd quarter relating to high school transitions, dental care, employment, and legislative advocacy.

Item 2. The variance of the planned 10 to the actual 12 systems change activities is due to additional collaborative initiatives with various service provider agencies to co-sponsor a High School Transition Training and Resource Fair on Maui and an Employment Capabilities Fair on Kauai.

Item 6. The variance of 70 to the actual 425 collaboration/coordination activities is due to an increase in staff involvement and participation on numerous committees, work groups, task forces, and coalitions statewide.

PROGRAM TITLE: GENERAL ADMINISTRATION

05 05 04 HTH 907

### **PART I - EXPENDITURES AND POSITIONS**

FY 2009: The variance in expenditures is attributed primarily to a collective bargaining augmentation and the redistribution of the legislative discretionary reduction.

FY 2010 (9-mos ending): The variance in the position count is attributed to the reduction in force.

### **PART II - MEASURES OF EFFECTIVENESS**

FY 2009, FY 2010: The variance is attributed to complexities in accurately projecting this data. The percentage of grievances resolved in a fiscal year is affected by many variables and may fluctuate significantly from year to year. The Department continues to work diligently to resolve open cases.

### **PART III - PROGRAM TARGET GROUPS**

No significant variance.

### **PART IV - PROGRAM ACTIVITIES**

#### FY 2009:

- 1. The planned figure was omitted. Therefore, the variance reflects the actual figure for FY 2009.
- 2. The data is incomplete at this time due to staff vacancies. The Department is intent on ensuring this data is complete in the future.
- 3. The variance is attributed to complexities in accurately projecting this data. The number of new grievances registered in a fiscal year is affected by many variables and can fluctuate significantly from year to year. The Department continues to work diligently to keep this number to a minimum.

### FY 2010:

- 1. The number of legislative proposals tracked by the Department for information or testimony is generally about 2000. The lower estimate for FY 2010, relative to the general average of 2000, is believed to be attributed to the State's financial situation that resulted in less proposals submitted for consideration.
- 2. The data is incomplete at this time due to staff vacancies. The Department is intent on ensuring this data is reported in the future.
- 3. The variance is attributed to complexities in accurately projecting this data. The number of new grievances registered in a fiscal year is affected by many variables, including RIF, and may fluctuate significantly from year to year. The Department continues to work diligently to keep this number to a minimum.
